INDICATOR METADATA

Health care (Eurostat)

**June 2024**

## Health care (Eurostat)

### About

This dataset is from the [WHO Health Inequality Data Repository](#).

This dataset contains indicators in European countries related to health care disaggregated by age, economic status, education, place of residence and sex.

Eurostat produces European statistics in partnership with National Statistical Institutes and other national authorities in the EU Member States. This partnership is known as the European Statistical System (ESS). It also includes the statistical authorities of the European Economic Area (EEA) countries and Switzerland.

### Data source

Data were downloaded from the Eurostat data browser (<https://ec.europa.eu/eurostat/databrowser>) via the [SDMX API](#), within the Population and social conditions > Health > Health care theme. These indicators are originally sourced from the European Health Interview Survey (EHIS) and the EU Statistics on Income and Living Conditions survey (EU-SILC).

### Methodology

The general coverage of the EHIS is the population aged 15 or over, while the coverage of EU-SILC is the population aged 16 or over.

Please refer to this resource for metadata for the EHIS:

[https://ec.europa.eu/eurostat/cache/metadata/en/hlth\\_det\\_esms.htm](https://ec.europa.eu/eurostat/cache/metadata/en/hlth_det_esms.htm)

Please refer to this resource for metadata for the EU-SILC:

[https://ec.europa.eu/eurostat/cache/metadata/en/hlth\\_silc\\_01\\_esms.htm](https://ec.europa.eu/eurostat/cache/metadata/en/hlth_silc_01_esms.htm)

### Dataset metadata

<b>Date of first publication</b>	April 2023
<b>Date of updated publication</b>	June 2024
<b>Expected frequency of update</b>	Annual
<b>Date of data extraction</b>	19 April 2024
<b>Temporal coverage</b>	2003–2023
<b>Spatial coverage</b>	Regional (Europe)
<b>Spatial granularity</b>	National
<b>Number of countries, territories or areas</b>	36
<b>Number of indicators</b>	23
<b>Number of dimensions of inequality</b>	5

## Inequality dimensions

**Age** refers to the age of the respondent at the time of the survey, grouped in six subgroups: 16-24 years (or 15-24 years), 25-34 years, 35-44 years, 45-55 years, 55-64 years and 65+ years.

**Economic status** is computed on the basis of the total equivalised disposable income attributed to each member of the household. The data (of each person) are ordered according to the value of the total equivalised disposable income. Four cut-point values (the so-called quintile cut-off points) of income, dividing the survey population into five groups equally represented by 20 % of individuals each. The first quintile group represents 20 % of population with lowest income and the fifth quintile group 20 % of population with highest income.

**Education** reflects the educational attainment of the respondent, classified according to the International Standard Classification of Education (ISCED) version of 1997.

**Place of residence** refers to urban or rural place of residence, which is context-specific. Geographical areas are mapped (at level Local Administrative Units–Level 2; municipalities or equivalent) by degree of urbanization.

**Sex** refers to the male or female sex of the respondent.
