INDICATOR METADATA

Subnational neonatal and under-five mortality (UN
IGME)

June 2024

Subnational neonatal and under-five mortality (UN IGME)

About

This dataset is from the [WHO Health Inequality Data Repository](#).

This dataset contains data for neonatal and under-five mortality rate estimates disaggregated by subnational region produced by the United Nations Inter-Agency Group for Child Mortality Estimation (UN IGME), for 31 countries across sub-Saharan Africa and Southern Asia.

The [UN IGME](#) is led by the United Nations Children's Fund (UNICEF) and includes the World Health Organization (WHO), the World Bank Group and the United Nations Population Division of the Department of Economic and Social Affairs as full members.

Data source

Under-five mortality rates are published by the UN IGME here: <https://childmortality.org/>.

Methodology

The UN IGME applies a common estimation method across all countries in the interest of comparability. A description of the methodology for calculating the estimates is available here: <https://childmortality.org/methods>.

Dataset metadata

Date of first publication	April 2023
Date of updated publication	June 2024
Expected frequency of update	Annual
Date of data extraction	22 April 2024
Temporal coverage	2001–2022
Spatial coverage	Global
Spatial granularity	National
Number of countries, territories or areas	31
Number of indicators	2
Number of dimensions of inequality	1

Inequality dimensions

For **subnational region**, country-specific criteria were applied to identify administrative levels.
